Professional Summary

Computer Engineering student at Vivekanand Education Society's Institute of Technology (VESIT) with a diploma in Computer Engineering from V.P.M's Polytechnic, Thane. Skilled in **full-stack web development** (MERN stack), **database management**, and **backend development** with experience in **React.js**, **Express.js**, **SQL**, and **software testing**. Possesses a growing expertise in **Artificial Intelligence (AI)**, **Machine Learning (ML)** and **agentic AI systems**, also exploring **Blockchain** and the development of and **intelligent assistants** that integrate seamlessly into web and mobile platforms. Enthusiastic about leveraging **AI** and **Web3** technologies for **innovative, secure, and real-world problem-solving**. Worked as an active member of **CSI VESIT**, contributing to technical events and workshops. Passionate about **software development**, sports, and beatboxing.

Education

B.E in Computer Engineering - CGPA. 9.84

Vivekanand Education Society's Institute of Technology (VESIT), Chembur.
2024 – Present

Diploma in Computer Engineering - 94%

V.P.M's Polytechnic, Thane.
Completed in 2024

Experience

Web Development Intern – Digikraf, Thane.

June 2022 – July 2022

Worked on various web portals, including **Edgrade**, **PropertyThane**, **CARZBOT** and **ThaneWeb**, contributing to their **development and enhancement**

Junior Web Tech Officer – CSI VESIT

2024 – 2025

- Organized and contributed to **technical events** and **workshops** for students.
- Worked on website development** using **React.js** and **Express.js**.
- Assisted in **managing technical content** and **student engagement activities**.

Tech Support Member – Prakhar Innovations Hub – CMPN

2025 – 2026

- Maintained and updated the organization's website.
- Conducted workshops on **AI tools** and **agentic AI**.
- Supported and coordinated technical events.

Technical Skills

Programming Languages: Java, C, C++, Python, JavaScript, SQL

Web Development: React.js, Next.js, Express.js, HTML, CSS, JavaScript

Backend Technologies: Node.js, PHP

Automation & AI Workflow Tools: n8n (Workflow Automation), LangChain, Google ADK.

Database Management: SQL, MongoDB, MySQL, Firebase

Software Development: Data Structures & Algorithms, Operating Systems, Software Testing

Tools & Frameworks: Git, Postman, AWS

Projects

VPM-X (University Dashboard Management) • [Project Report](#)

- Designed and developed a University Dashboard leveraging **React**, **Node.js**, **Express**, and **MongoDB**.
- Developed **interactive tools** such as a **built-in code compiler** and a quiz module to enhance user engagement.
- Integrated a **Telegram bot** for instant notifications and efficient communication.

PragnaPath - Cognitive-Adaptive Multi-Agent Learning Companion • [Live](#)

- Built a **multi-agent AI** learning system using **Google ADK** with orchestrated **LLMAgents**.
- Implemented real-time learner profiling to dynamically adapt teaching style.
- Developed backend with **FastAPI** and frontend using **React + Tailwind**.
- Designed **accessibility-first AI** with dyslexia-safe and screen-reader support

AlumnNet - Alumni-Student Mentorship Portal • [Live](#)

- Developed a mentorship and opportunity platform connecting students and alumni.
- Implemented **role-based authentication** and **profile-driven skill matching**.
- Integrated **AI-based semantic matching** to recommend relevant mentors using skill similarity.
- Enabled **real-time messaging** and centralized opportunity sharing.
- Designed **mentorship slot booking** with **automated scheduling** and meeting link generation

Mini Projects (Diploma) : Developed various projects across multiple technologies:

- Employee Management System (Java)** – Managed employee records with CRUD operations.
- Railway Management System (Java)** – Managed train schedules, platform allocations, and record-keeping efficiently.
- Hotel Management System (C, Data Structures)** – Implemented room booking and billing system.
- Fitness Buddy App (Java, Firebase)** – Personalized fitness tracking with cloud storage.
- Sports Management System (.NET Forms)** – Organized sports events and player records.
- Professional To-Do List (PHP, MySQL)** – Task management with user authentication.
