Professional Summary

Computer Engineering student at **Vivekanand Education Society's Institute of Technology (VESIT)** with a **Diploma in Computer Engineering** from **V.P.M's Polytechnic, Thane**. Skilled in **full-stack web development** (MERN stack), database management, with experience in **React.js, Express.js, Node.js and SQL**. Possesses a strong foundation in **Object-Oriented Programming, Data Structures and Algorithms**, Database Management Systems, and **Operating Systems**. Actively building expertise in **Artificial Intelligence (AI), Agentic AI systems, Machine Learning**, and intelligent assistants that integrate seamlessly into web applications. Enthusiastic about leveraging emerging technologies to develop innovative real-world solutions.

Education

B.E in Computer Engineering - CGPA. 9.83

Vivekanand Education Society's Institute of Technology (VESIT),
Chembur.

2024 – Present

Diploma in Computer Engineering - 94%

V.P.M's Polytechnic, Thane.

Completed in 2024

Experience

Web Development Intern – Digikraf, Thane.

June 2022 – July 2022

- Worked on various web portals, including Edgrade, PropertyThane, CARZBOT and ThaneWeb, contributing to their development and enhancement

Junior Web Tech Officer – CSI VESIT

2024 – 2025

- Organized and contributed to technical events and workshops for students.
- Worked on website development using React.js and Express.js.
- Assisted in managing technical content and student engagement activities.

Tech Support Member – Prakhar Innovations Hub – CMPN

2025 – 2026

- Maintained and updated the organization's website.
- Conducted workshops on AI tools and agentic AI.
- Supported and coordinated technical events.

Technical Skills

Programming Languages: Java, C, C++, Python, JavaScript, SQL

Web Development: HTML, CSS, JavaScript, React.js, Next.js, Express.js

Backend Technologies: Node.js, PHP

Automation & AI Workflow Tools: N8N (Workflow Automation), LangChain, Google ADK.

Database Management: SQL, PostgreSQL, MongoDB, Firebase

Software Development: Data Structures & Algorithms, Operating Systems, Software Testing

Tools: Git, Postman, AWS

Projects

VPM-X (University Dashboard Management) • [Project Report](#)

- Designed and developed a **University Dashboard** leveraging **React,Node.js, Express**, and **MongoDB**.
- Developed **interactive** tools such as a **built-in code compiler** and a **quiz** module to enhance user engagement.
- Integrated a **Telegram bot** for instant notifications and efficient communication.

PragnaPath - Cognitive-Adaptive Multi-Agent Learning Companion • [Live](#)

- Built a **multi-agent AI** learning system using **Google ADK** with orchestrated **LLMAgents**.
- Implemented **real-time** learner profiling to **dynamically adapt** teaching style.
- Developed backend with **FastAPI** and frontend using **React+Tailwind**.
- Designed **accessibility-first AI** with dyslexia-safe and screen-readersupport

AlumnNet - Alumni-Student Mentorship Portal • [Live](#)

- Developed a mentorship and opportunity platform connecting students and alumni.
- Implemented **role-based authentication** and profile-driven skill matching.
- Integrated **AI-based semantic matching** to recommend relevant mentors using skill similarity.
- Enabled **real-time messaging** and centralized opportunity sharing.
- Designed **mentorship slot booking** with **automated scheduling** and meeting link generation

Mini Projects (Diploma) : Developed various projects across multiple technologies:

- Employee Management System** (Java) – Managed employee records with CRUD operations.
- Contact Management System** (C, Data Structures) – Managed contact records efficiently.
- Fitness Buddy App** (Java, Firebase) – Personalized fitness tracking with cloud storage.
- Professional To-Do List** (PHP, MySQL) – Task management with user authentication.
